

Final Presentation – Classification of Text ML-Approach

Master Internship: Approaching Information System Challenges with Natural Language
Processing (IN2106, IN2130)

Garching, 30 January 2024

Agenda

- 1) Mission
- 2) How I planned the project
- 3) How it went
- 4) Explanatory UMAP
- 5) Results
- 6) Code Demo

Mission: Situation – Complication – Resolution

Situation

Companies have lots of business processes which need to be affirmative to legal requirements.

Complication

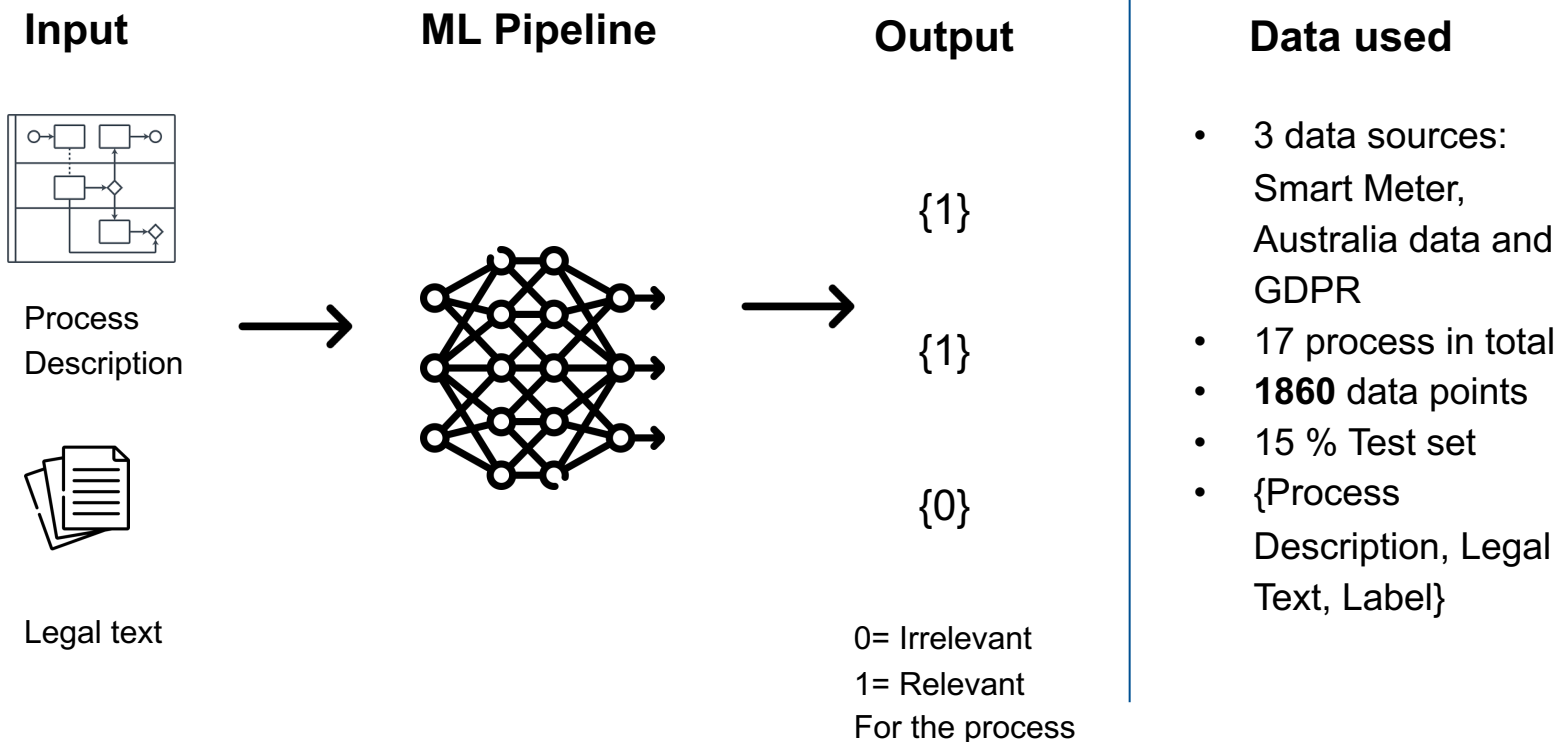

The compliance checking is quite labour-intensive and costly.

Solution

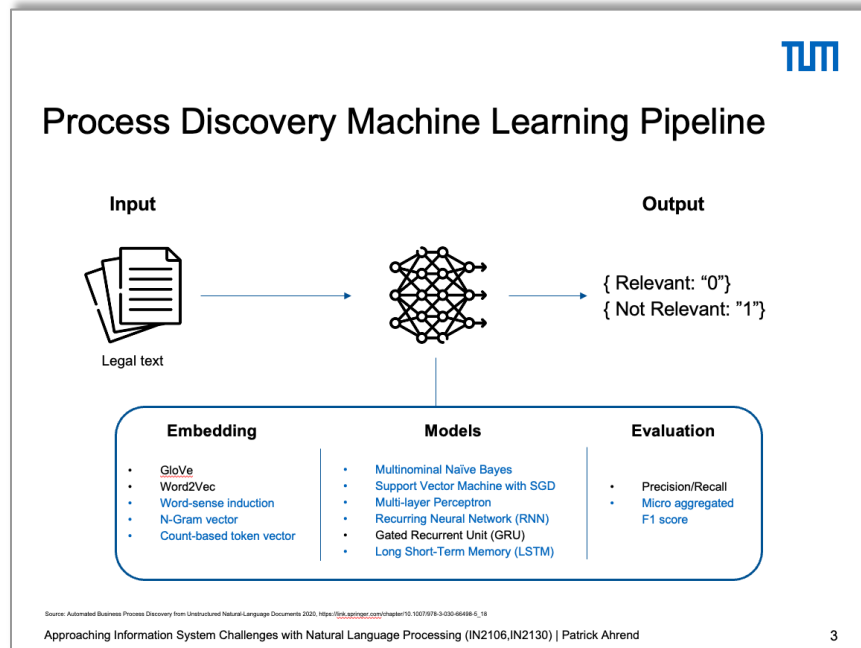

Semi Automation with ML model which is able to identify new regulations for human review.

Solution: Machine Learning Pipeline for text classification

UMAP for Explanatory Data Analysis

Evaluation - Quantitatively 1/2

Evaluation - Quantitatively 2/2

Evaluation - Qualitatively

- 9 data points from travel insurance
- SGD, RNN, Perceptron, SVD failed to learn
- GPT and Bert predicted quite differently
